

ELECTRIC CARS

Art Project

You don't need an adult to drive this car!

MATERIALS:

Paper Plate
Colored Tissue
Paper
White and Black
Cardstock

Glue
Scissors
Stapler

- 1** Take a paper plate and cut in half. This way you are able to make two cars!
- 2** Pick your favorite color (or colors!) of tissue paper and cut it into small squares.
- 3** Cover your plates in glue. Then, place your tissue paper on top of the glue until your plate is completely covered.
- 4** Once you're finished, let them dry completely. While you're waiting, you can take your black cardstock and cut out other parts that your car needs! Start with two circles for your wheels and a smaller half circle for a front light. You can also cut out a window!
- 5** Use a stapler to attach these new parts to your car!
