

FLOODS

Art Project

Make a raindrop suncatcher!

MATERIALS:

tissue paper	marker
wax paper	white paper
glue	tape

- 1** Draw a cloud and a small number of raindrops onto your piece of white paper. Then cut them out!
- 2** Cut your tissue paper in small squares. You can also tear it into small pieces for a different look!
- 3** Trace your raindrops onto your wax paper and cover the wax paper with glue.
- 4** Cover the wax paper with your pieces of tissue paper. Make sure to press them down so they stick! After you have filled the whole raindrop, cover with a layer of glue to keep everything in place. Let dry.
- 5** Cut out your raindrops. They are now ready to hang on your windows! You can tape your cloud above the raindrops to see where they come from.
