

# NATURAL RESOURCES PLANTS

## Grow A Seed

Follow the instructions below to watch seeds sprout in a jar

### MATERIALS:

A glass jar

Paper towels

Large seeds:  
either bean, squash, or pea

Water

A sunny windowsill

Pencil or camera

- 1** Wet the paper towels. Wring out any extra water.
- 2** Fill the jar with the wet paper towels. They may need to be ripped or folded to fit.
- 3** Place four seeds between the paper towels and the side of the jar. Make sure there is at least two inches between the seeds so they have room to grow.

- 4** Place the jar near a window in a sunny spot.
- 5** Check the seeds every day and watch how they grow. You may need to add water to your jar to keep the paper towels damp. You can draw what you see on the back of this sheet, or take pictures with a camera.
- 6** Once you see leaves sprout from your seeds plant them in a garden!
