

# POLLINATORS MOTHS

## Matching

Match the glossary word on the left to its definition on the right.

**camouflage**

An animal that  
hunts other  
animals for food.

**adapt**

To develop traits  
that make it easier  
to survive in an  
environment.

**habitat**

A pattern, color, or  
shape that helps an  
animal blend in with  
its surroundings.

**nectar**

To copy how  
something else  
looks or behaves.

**pollen**

The area where an  
animal normally lives.

**mimic**

A sweet, sugary liquid  
made by a plant.

**predator**

Fine, dust-like stuff  
that flowers create  
and use to reproduce.
